13	0.882	---	69	22	27	29

If a customer is unsure of their ring size and does not have one of our Ring Sizing Sets, we can recommend several ways to find out;

The *first method* and the simplest way, is to go to your local jeweller and they will be able to measure your finger for your correct size.

The *second method* is a little more complicated but just as effective, start by measuring the 'inside diameter' of a ring that already fits the finger and check the number that correlates with the measurement on the ring size guide above (*inches*).

The *third method* is to use our Ring Sizer below. In order to print the Ring Sizer, be sure that your printer is set to 100%. In other words, make sure that you have not reduced the print size in 'page set up.' You can verify that the Ring Sizer printed correctly by measuring the printed version with the actual measurements (*metric*).

Note: The inside of your ring should be used to measure the Ring Size, not the outside.

The *fourth method* is to print off the below image and check that the printer is set to 100%. You can verify that the Ring Sizer printed correctly by measuring it with a ruler; it should measure from left to right: 3 1/2 inches.

Once you have printed the Ring Sizer, you may cut it out and use it or try the following directions to measure ring size of your finger:

1. Wrap a piece of loose string or paper around your finger. Be sure to allow for the size of your knuckle.
2. With a pen, mark the point on the string or paper where the end meets.
3. Using the chart, place the end of the string or paper on the left hand line next to the letter "A" and stretch the string or paper along the Ring Sizer toward the numbers.
4. The pen mark on your string or paper should line up with a number to indicate your ring size.

Note: The US Sizes are the same as the Australian Sizes.
